

JETWING BEACH

SUSTAINABILITY PERFORMANCE | 2021

Environmental Performance

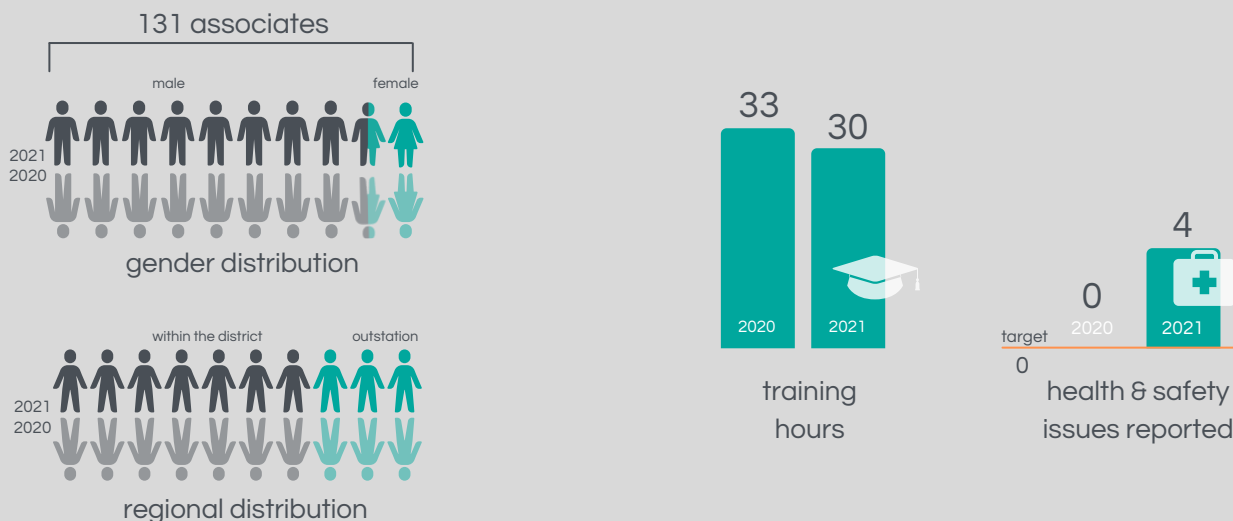

¹ Contribution of renewables varied due to changes in operations and availability of energy resources (i.e. biomass).

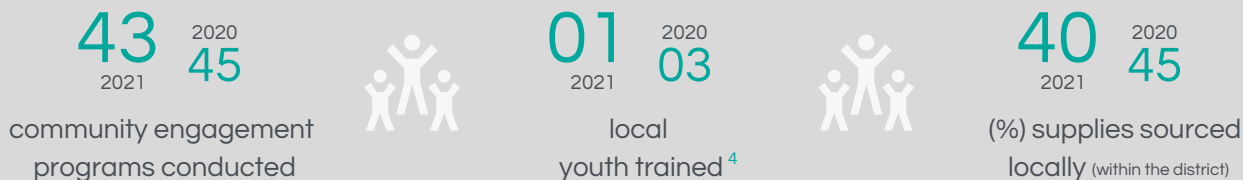

² A marked increase in specific water use recorded during the year(s), primarily as a result of reduced occupancy levels and temporary suspension of operations.

³ Waste collection processes disrupted during the pandemic lockdowns.

Employee Relations

Community Engagement

⁴ Opportunities for community development programmes limited during the pandemic lockdowns.
